Soon to be released

WHAT EVERY AMERICAN AND THE WORLD SHOULD KNOW ABOUT 9/11

BY BERNARD E. ROMAIN

and contributing authors

“What Every American and the World Should Know About 9/11” is a collection of investigative, thought-provoking, informational, insightful, and soul-stirring writings about the events of 9/11 and their consequences. It represents the collective work of investigators, journalists, scientists, and researchers who have been delving deeply into the facts surrounding 9/11 for many years. The information they expose will certainly cause anyone reading this book to re-examine the events of 9/11 and seriously question what they believe.

“...When a crime is committed the first thing that should be done is to investigate motive. Who benefited, Cui bono? Who gained the most from the crime? Most crimes have been solved that way throughout history. Finding out who benefited the most sometimes is not easy to determine. Many times the real benefits are hidden. It may take time for the real benefits to be seen especially when the crime has been well-organized and well-planned by cunning planners. Having people believe that a major undertaking—such as the attacks of 9/11—was done by some blind senseless Arabs, bent on exercising rage against America, is a ploy. It is a ploy done to keep people from looking at the true beneficiaries of the event and therefore finding the real culprits.

This book will present a mountain of evidence pointing to the direct involvement of Israel and top Neocon members in the Bush administration as perpetrators of the 9/11 attacks. Fitting the profile of true criminals who benefit from their crime, the State of Israel and top Neocon members in the Bush administration have gained tremendous benefits as a result of actions taken by the US government in response to the 9/11 attacks. Close scrutiny will show that they engineered 9/11 to create a Pearl Harbor type of event that would act as a catalyst to galvanize American military, financial and influential resources to fight wars and take actions for the purpose of advancing American and Israeli hegemony in the Middle East and the world. For Israel in particular one major benefit is easily seen. After the 9/11 “terrorist” attacks, all of Israel’s enemies have become America’s enemies. The war in Iraq is a good example because Iraq—one of Israel’s long time arch enemies—was attacked by the US under false pretense. The real reason, which was never stated publicly, was that Iraq was never a threat to the US. Iraq was never involved with 9/11 nor did it possess weapons of mass destruction. But it certainly was a threat to Israel. 9/11 was the catalyst and justification for military actions taken by the US not only against Iraq but Afghanistan and soon to be Iran and other Middle Eastern / Islamic countries. These pre-emptive actions are taken under the banner of fighting terrorism necessitating “unending wars” as a result of the events of 9/11.”
